

Saqlain *Amin*

Full Stack Developer · IT Educator · Head of Engineering

Drosh, Chitral — Pakistan | saqlainamin646@gmail.com | saqlainamin.online

Profile

A results-driven engineer and educator who graduated top of his class with a Gold Medal from the University of Chitral, founded a software startup, and now leads a team of 6 developers delivering full-stack MERN and Next.js solutions for local and international clients — all from the mountains of Chitral. Portfolio and full case studies at saqlainamin.online.

Experience

April 2026 – Present

Head of Engineering

SADEVZ

- Lead a cross-functional team of 6 developers across 5+ simultaneous active projects
- Oversee architecture, code quality, and delivery of full-stack MERN and Next.js applications
- Scaled SADEVZ from a solo venture to a structured software development studio

March 2024 – March 2026

Director Academics

MAIT Chitral

- Managed the institute on both academic and administrative sides
- Developed and maintained curricula for 9+ subjects followed across the institution
- Trained 50+ students in Website Development within Chitral

INDEPENDENT PRODUCTS

PocketPeshi

PRIVATE USE

PocketPeshi rebuilds the lawyer's traditional case diary as a mobile-first app. The home screen is a live calendar — opening any date surfaces that day's cases, so a lawyer or their assistant can record what happened at each proceeding and fix the next hearing date right from the entry, including miscellaneous and interim proceedings that don't fit a single case's timeline. Built as a role-based system for admins, lawyers, and assistants, so a whole chamber can run its diary from one shared tool instead of paper registers.

Next.js · TypeScript · Tailwind · Prisma · Supabase · Capacitor · Vercel

Developed and shipped — in daily private use by 17 lawyers; public portfolio listing pending paperwork.

Madina Home Textile

LIVE DEMO

An ecommerce storefront for a home textile retailer selling curtains, foam, carpets, and related household items. Shoppers browse the catalog and check out directly on the site, while a purpose-built admin panel lets the owner manage products, track orders, and read sales analytics without a spreadsheet. A lightweight built-in CMS handles the storefront's content — banners, categories, and promotional copy — so the shop can update itself without a developer.

Next.js · TypeScript · Tailwind · Framer Motion · Prisma · Supabase · Vercel

-> madina-home-textile.vercel.app

Chitral Bazar

IN DEVELOPMENT

A directory app for the whole Chitral Bazar: every registered shop is pinned on a custom-designed map of the bazar, shown right on the home screen, so users find a shop by location rather than scrolling a list. Shoppers can follow their favorite shops and leave reviews; ecommerce ordering is planned as the next layer once the shop directory and map are complete.

Next.js · TypeScript · Tailwind · Framer Motion · PostgreSQL · Prisma · Supabase · Cloudinary · Leaflet.js · OpenStreetMap

SADEVZ CLIENT WORK

Native Resort & Camping — Bamborate

DELIVERED

A full-stack booking and management system for a resort and camping site in Bamborate — covering reservations, guest and site management, and day-to-day operations from a single admin dashboard. SADEVZ's largest project to date, delivered May 2026.

SADEVZ Client Project

Drosh Inn Hotel Platform

DELIVERED

A multi-page hotel website with a full admin dashboard for managing bookings and rooms, Chart.js-powered analytics for tracking occupancy and revenue, and PKR pricing tailored to local guests. SADEVZ's first client project, delivered June 2024.

SADEVZ Client Project

SaFit — AI Diet Tracker

DELIVERED

An AI-assisted diet and nutrition tracking application, built under the SADEVZ portfolio to help users log meals and stay on top of their nutrition goals.

SADEVZ Client Project

Zubi VPN App

DELIVERED

An Android VPN application focused on simple, secure browsing — SADEVZ's first foreign/international project, delivered January 2023.
